Wiremanagement

Wire management has a powerful function of crossline laying of vertical and horizontal wiring. Module lay on cable management system allows assemblage of wires and division of power, communication and data cables. You have the freedom to specify power only where you need it. It also enables immediate reconfiguration which saves significant installation cost and time.

Height Option Chart

1175

Maintains the open feeling, but makes the desktop a bit more private, which enhances work efficiency.

1635

High enough to surround office equipment. That makes the office look neat and cuts down on noise. With this height you can choose from a range of hanging units to add filing space.

2095

Suitable for creating executive areas and meeting rooms. Gives the sense of being in an entirely individual room, yet see through panel grids can be used to oversee operations in other areas.

2555

An alternative to constructing an actual wall to separate different divisions or departments. This gives you the maximum degree of privacy a panel can provide. Doors can be added at this height.

5 ELEMENTS Library of Options

Markerboard Tiles

Heights: 8", 16", 24", 32"
Widths: 18", 24", 30", 36", 42", 48", 54", 60"

Slat Tiles

- ❑ Our constant endeavour is towards perfection and innovation so as to surpass customer satisfaction. Our customer needs and meeting their timely requirement is the key to our success.

CNC BEAM SAW EB-120 ACTIVE

Cutting large quantity of panels is done on this fine piece of machine imported from M/s BIESSE, Italy. The panels are cut in exact dimensions as required through an optimisation software.

SLIDING TABLE PANEL SAW

These machines are used to cut the wooden panels in exact dimensions as provided. The final panels produced have a perfect 90 degree cut.

THROUGH FEED EDGE-BANDING

We have world leading Ergho5 from M/s BIESSE Italy. It allows the application of edge-banding material in rolls and strips from 0.4mm to 15mm thickness. It can be customized to any edge-banding requirement.

MANUAL EDGE BANDING MACHINE

Curvi linear Edge banding is done on FRAVOLA16S. It can produce straight, rounded or curved panels. It permits the application of Veneer, Melamine, PVC and ABS edges up to 3mm thick and solid wood edges up to 4mm.

CNC MACHINING CENTRE

CNC Machining is done on Rover 22 manufactured by M/s BIESSE Italy. This machine can produce any shapes drawn on the drawing and can drill on the system 32 drilling pattern.

POSTFORMING

Post forming is done on this fully PLC controlled machine. It has better work piece holding due to uniform pressure. It is fully automatic PLC controlled machine resulting in perfectly finished pieces of postformed panels.
